

## Blow Type Application Examples

### ● Removal of static charges when taking out or storing wafers

Avoids electrostatic discharging when taking wafers out of their cassettes, and prevents the stored wafers from being attracted to the transfer arm.

### ● Removal of static charges when conveying wafers

Prevents dust from being attracted to the surface of wafers. Prevents the internal patterns from being damaged.

### ● Removal of static charges on parts when carried by a parts feeder

Static electricity is generated due to friction of parts while the parts feeder conveys them, and the parts stick to feeder's surface. Use the blow type ionizer to prevent parts from being stuck caused by static electricity. Also, simultaneous use with a fan type is effective against the static electricity removal.

### ● Removal of static charges on wafers

Use blow type ionizers with shower nozzles that provides ionized air flow with a wide angle to remove static charges on wafers.

### ● Removal of static charges and particles on CDs and DVDs

Use 2-head types with bender nozzles to remove static charges and particles on CDs and DVDs from both sides.

### ● Removal of static charges on wrap film

Use blow type Ionizers with U-shaped bar nozzles in confined space to remove static charges on both sides of the wrap film.

● **Removal of static charges on devices carried by pallets**

Use blow type Ionizers with straight bar nozzles to remove static charges on a wide carrying pallet.

● **Removal of static charges in printing process**

Use 2-head type Ionizers with bender nozzles. Prevents faulty printing caused by static charges in ink jet printing process.

● **Removal of static charges in bottles (Removal of dust)**

Use a spiral bar nozzle to remove static charges inside a bottle.

● **Removal of static charges on electronic parts**

**Very low generation of electrical noise**

- No damage to a device caused by induction electric field by the discharging needle.
  - Removal of static charges with pin point accuracy (It is possible to place the nozzle close to a device by using the tube.)
- Note: Select a tube in accordance with the degree of tube flexibility.

● **Removal of static charges on glass substrate**

Use 2-head type Ionizers with two straight bar nozzles to remove static charges on FPD glass.

● **Removal of static charges in pipes (φ50 or less)**

By inserting the tube inside a pipe enables removal of static charges.

## Select the nozzle for your application

### ● Shower nozzle

- Blows ionized air at 60° or 90° angles

### ● Flat nozzle

- Blows ionized air at 90° angle, suitable for removal of static charges over relatively wide area.

### ● Straight bar nozzle

- Removal of static charges over a wide area.
- 5 types of bar nozzles are applicable for 100 to 500 mm ionized air coverage.

### ● Use of two straight bar nozzles

- Removal of static charges from both sides of film simultaneously.

### ● L-shaped bar nozzle

- Space saving and suitable for locations where straight bar nozzles can't reach.
- 2 types of L-shaped bar nozzles are applicable for 100 and 200 mm ionized air coverage.

### ● U-shaped bar nozzle

- Removal of static charges from both sides simultaneously up to 100 mm wide film.

### ● Free-mounting L-shaped bar nozzle

- Enables the bar rotation to change the direction of the ionized air flow outlet.
- It is applicable for 100 and 200 mm ionized air coverage.

### ● Combining various nozzle units with bender nozzles

- Combining various nozzle units with the flexible tube enables static charge removal for various applications.

Note: Nozzle units can be only attached to the nozzles with a bender nozzles (DTRY-NZR□00ND and DTRY-NZL□00ND)  
For installation of nozzle unit, see page 29.

# Specifications

BLOW TYPE

## Blow Type and Compact Blow Type

Model		DTRY-ELB01 (Main Unit for 1-head Type)	DTRY-ELB02 (Main Unit for 2-head Type)	DTRY-ELL01 (Main Unit for 1-head Type)
Power supply		24 VDC ± 5%		
Consumption current	mA	Approx. 100		
Output voltage	kV	Approx. 2 (High frequency type)		
Indicator LED	Power supply	While power is supplied, power indicator LED (Green) turns on.		
	Abnormality	When an abnormal discharge occurs, the abnormality indicator LED (Red) turns on.		
Power safety circuit		The contact point output NO/NC is selectable when an abnormal discharge occurs. <sup>Note 1</sup> (24 DVC 50 mA Max.)		The contact point output NO/NC is selectable when an abnormal discharge occurs. <sup>Note 1</sup> (24 DVC 50 mA Max.)
Outer dimensions	mm	92(L)×30(W)×54(H) (Main unit only)	92(L)×62(W)×54(H) (Main unit only)	65(L)×25(W)×47(H) (Main unit only)
Mass	g[oz.]	190 [6.70] (Main unit only)	300 [10.58] (Main unit only)	122 [4.30] (Main unit only)
Ion balance <sup>Note 2</sup>	V	±15		
Ozone generation amount	ppm	0.037 or less (When measured at 300 mm apart from the nozzle outlet with a standard nozzle and 0.25 MPa air at primary side.)		
Media <sup>Note 3</sup>		Air (vapor- and oil-removed clean air)		
Supply air flow rate	ℓ/min(ANR)	Approx. 100 (with DTRY-NZR01NS nozzle and 0.15 MPa air at primary side, per head.)		Approx. 50 (with DTRY-NZL01NS nozzle and 0.1 MPa air at primary side)
Operating air pressure range	MPa[psi.]	0.02 ~ 0.25 [3 ~ 36] (with DTRY-NZR01NS nozzle) 0.02 ~ 0.12 [3 ~ 17] (with DTRY-NZR02S nozzle) 0.02 ~ 0.12 [3 ~ 17] (with conductive urethane, Teflon or silicone tube) 0.05 ~ 0.25 [7 ~ 36] (with DTRY-NZR100ND ~ 500ND nozzles) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR20SW nozzle) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR21SW nozzle) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR01FT nozzle) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR200SP nozzle) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR100B ~ 500B nozzles) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR100L ~ 200L nozzles) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR100U nozzle) 0.05 ~ 0.40 [7 ~ 58] (with DTRY-NZR100FMT ~ 200FMT nozzles)		0.05 ~ 0.5 [7 ~ 73]
Operating ambient temperature	°C[°F]	0 ~ 40 [32 ~ 104] indoor (avoid a place subject to dew condensation)		
Accessories		1 pc. power and signal cable (2 m), 1 pc. ground wire (2 m), and 1 pc. contact point selector protection sticker		1 pc. power and signal cable (2 m), 1 pc. bracket, and 1 pc. contact point selector protection sticker

Notes 1: For output of abnormality output contact point, see page 23.

2: The ion balance value of the DTRY-ELL01 is the value when the air flow rate is 150 ℓ/min(ANR).

3: Always turn on the power supply with supplying air.

Remarks 1: When using two or more ionizers, mount them at least 10 mm apart. Closer mounting may cause a detrimental effect or detrimental ion balance.

2: Ion balance is measured by in-house test standard. Consult us for details.

## Graphs of Static Charge Removing Characteristics

(when using the standard nozzle) ※ See pages 23~28 for Graphs of Static Charge Removing Characteristics when using the other nozzles.

### Blow Type DTRY-ELB01

### Compact Blow Type DTRY-ELL01

## Controller

Model		DTRY-ELC11
Power supply		24 VDC ± 5%
Consumption current	mA	410
Outer dimensions	mm	222 (L) × 60 (W) × 135 (H) (Main unit only)
Mass	g[oz.]	830 [29.28] (Main unit only)
Media		Air
Max. flow rate	ℓ/min(ANR)	150 (0.7 MPa at primary-side pressure and 0.5 MPa at secondary-side pressure)
Operating pressure adjusting range	MPa[psi.]	0.02 ~ 0.5 [3 ~ 73]
Proof pressure	MPa[psi.]	1.5 [218]
Filter capacity	Filtering particle diameter μm	0.01
	Filtering efficiency %	99.99
Operating ambient temperature	°C[°F]	5 ~ 45 [41 ~ 113] indoor (avoid a place subject to dew condensation)
Accessories		1 pc. connection cable between controller and Ionizer (1.5 m)

Note: Pay attention to the maximum flow rate and operating pressure adjusting range when using the controller. It may cause a shortage of the flow rate compared to the one obtained not using the controller.

Remark: The Ionizer is a stand-alone unit. However, the use with the controller enables control of both power supply and air.

## Order code

### BLOW TYPE

#### Main Unit

- 1-head type  
**DTRY-ELB01**

- 2-head type  
**DTRY-ELB02**

**Caution** The main unit cannot be operated alone. Always use it with a nozzle.

**Caution** The discharging needles are covered with cover caps for protection. Remove the cap before installing the nozzle.

#### Nozzles for Blow Type

- Standard nozzle  
**DTRY-NZR01NS**

- Flat nozzle  
**DTRY-NZR01FT**

- Free-mounting L-shaped bar nozzles  
**DTRY-NZR100FMT**  
(Nominal size: 100 mm)  
**DTRY-NZR200FMT**  
(Nominal size: 200 mm)

- Bender nozzles  
**DTRY-NZR100ND** (100 mm)  
**DTRY-NZR200ND** (200 mm)  
**DTRY-NZR300ND** (300 mm)  
**DTRY-NZR400ND** (400 mm)  
**DTRY-NZR500ND** (500 mm)

- Straight bar nozzles  
**DTRY-NZR100B** (Nominal size: 100 mm)  
**DTRY-NZR200B** (Nominal size: 200 mm)  
**DTRY-NZR300B** (Nominal size: 300 mm)  
**DTRY-NZR400B** (Nominal size: 400 mm)  
**DTRY-NZR500B** (Nominal size: 500 mm)

- U-shaped bar nozzle  
**DTRY-NZR100U**

- Stainless steel pipe nozzle (120 mm)  
**DTRY-NZR02S**

- L-shaped bar nozzles  
**DTRY-NZR100L** (Nominal size: 100 mm)  
**DTRY-NZR200L** (Nominal size: 200 mm)

- Shower nozzles  
**DTRY-NZR20SW** (60° type)  
**DTRY-NZR21SW** (90° type)

- Spiral bar nozzle  
**DTRY-NZR200SP**

#### Option

- Bracket  
(For straight bar nozzle)  
**DTRY-ELQ02**

Caution: Dedicated for the blow type

#### Common Options for Blow Type and Compact Blow Type

- Bender shower nozzle units  
**DTRY-ADN-SW60** (60° type)  
**DTRY-ADN-SW90** (90° type)

- Bender flat nozzle unit  
**DTRY-ADN-FT01**

- Bender bar nozzle units  
**DTRY-ADN-100B** (Nominal size: 100 mm)  
**DTRY-ADN-200B** (Nominal size: 200 mm)

- Conductive urethane tube (500 mm)  
**DTRY-ADN-U**

Outer diameter:  $\phi 6$   
Inner diameter:  $\phi 4$

- Teflon tube (500 mm)  
**DTRY-ADN-F**

Outer diameter:  $\phi 7$   
Inner diameter:  $\phi 5$

- Silicone tube (500 mm)  
**DTRY-ADN-S**

Outer diameter:  $\phi 7$   
Inner diameter:  $\phi 4$

Note 1: The tube is a consumable item; periodic replacement is required.

: The **DTRY-ADN-S** and **DTRY-ADN-F** cannot be used for the earlier type standard nozzles **DTRY-NZR01S** and **DTRY-NZL01S**.

Remarks 1: Use Teflon tube for endurance-oriented, and silicon tube for flexibility-oriented.

2: 20 m or 100 m roll of conductive urethane tubes is available.

Order code: **U6A-B** (20 m)

**U6A-B-100** (100 m)

● Conductive urethane tube holder  
**DTRY-NZR31**

For application examples, refer to page 8

Caution: Dedicated use for conductive urethane tube

● Controller  
**DTRY-ELC11**

● AC adapter  
**DTRY-ELC04**

Rating  
Input : 100 VAC to 240 VAC  
50/60 Hz, 0.6A  
Output: 24 VDC, 750mA

● Tungsten discharging needle for replacement (supplied by a set of 5 needles)  
**DTRY-ELB11**

 Dedicated for **DTRY-ELLO1, DTRY-ELB01 & 02.**

● Dedicated tool for replacing the discharging needle  
Note: Bit alone is available.  
**DTRY-ELB21**

Shape of the bit inserting section

## BLOW TYPE Dimensions (mm)

### BLOW TYPE

#### Main Unit

##### ● 1-head type DTRY-ELB01

**Power and signal cable (Accessory)**

- Input power: +24 VDC
- Connector pin location and lead wire colors:

#1 [White]	#2 [Black]	Contact point output
#3 [Red]		Input power +24 VDC
#4 [Green]		Ground for power

Viewed from A-A'

Pin location of molex 5557-04R (female)

Notes 1: ON/OFF of the power to the Ionizer should be done at the input side (+24 VDC side).  
 2: Ground for power and ground terminal are connected inside.  
 3: For output of abnormality output contact point, see page 29.

##### ● 2-head type DTRY-ELB02

**Power and signal cable (Accessory)**

- Input power: +24 VDC
- Connector pin location and lead wire colors:

#1 [White]	#2 [Black]	Contact point output
#3 [Red]		Input power +24 VDC
#4 [Green]		Ground for power

Viewed from A-A'

Pin location of molex 5557-04R (female)

Notes 1: ON/OFF of the power to the Ionizer should be done at the input side (+24 VDC side).  
 2: Ground for power and ground terminal are connected inside.  
 3: For output of abnormality output contact point, see page 29.

**BLOW TYPE**

**Nozzles**

● **Standard nozzle DTRY-NZR01NS**

● **Stainless steel pipe nozzle DTRY-NZR02S**

● **Shower nozzle (60° type) DTRY-NZR20SW**

● **Shower nozzle (90° type) DTRY-NZR21SW**

● **Flat nozzle DTRY-NZR01FT**

● **Straight bar nozzle DTRY-NZR□00B**

Model	A	B	C	L	N
<b>DTRY-NZR100B</b>	100	129.7	168	175	11
<b>DTRY-NZR200B</b>	200	229.7	268	275	21
<b>DTRY-NZR300B</b>	300	329.7	368	375	31
<b>DTRY-NZR400B</b>	400	429.7	468	475	41
<b>DTRY-NZR500B</b>	500	529.7	568	575	51

■ **Bracket for straight bar nozzle DTRY-ELQ02**

Remark: Loosen the nut to adjust the direction of the ionized air flow outlet.  
 Note: Do not contact the nozzle with a grounded conductive object.  
 The abnormality indicator LED may turn on.

BLOW TYPE

**BLOW TYPE**

**Nozzles**

● Bender nozzle **DTRY-NZR□00ND**

Model	A	L
<b>DTRY-NZR100ND</b>	102	129
<b>DTRY-NZR200ND</b>	202	229
<b>DTRY-NZR300ND</b>	302	329
<b>DTRY-NZR400ND</b>	402	429
<b>DTRY-NZR500ND</b>	502	529

■ Optional nozzle units for bender nozzles. (use the unit at the tip of a flexible tube for changing a nozzle)

● Bender shower nozzle unit (60° type) **DTRY-ADN-SW60**

● Bender shower nozzle unit (90° type) **DTRY-ADN-SW90**

● Bender flat nozzle unit **DTRY-ADN-FT01**

● Bender bar nozzle unit **DTRY-ADN-□00B**

Model	A	B	L	N
<b>DTRY-ADN-100B</b>	100	129.7	158	11
<b>DTRY-ADN-200B</b>	200	229.7	258	21

Remark: Loosen the nut to adjust the direction of the ionized air flow outlet.  
 Note: Do not contact the nozzle with a grounded conductive object.  
 The abnormality indicator LED may turn on.

BLOW TYPE

## Dimensions of Common Options for **BLOW TYPE** and **COMPACT BLOW TYPE** (mm)

### TUBES

#### ● Conductive urethane tube **DTRY-ADN-U**

#### ● Teflon tube **DTRY-ADN-F**

Note: The **DTRY-ADN-F** cannot be used for the earlier standard nozzles **DTRY-NZR01S** and **DTRY-NZL01S**.

#### ● Silicone tube **DTRY-ADN-S**

Note: The **DTRY-ADN-S** cannot be used for the earlier standard nozzles **DTRY-NZR01S** and **DTRY-NZL01S**.

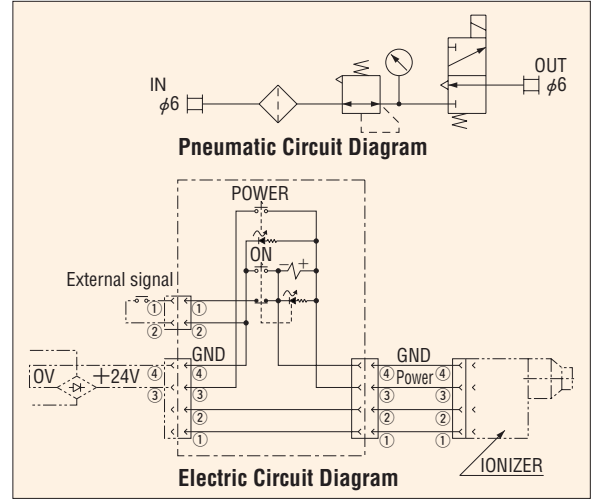

#### ■ Conductive urethane tube holder **DTRY-NZR31**

Note: The tube holder is the dedicated model for the conductive urethane tube **DTRY-ADN-U**. It cannot be used with the Teflon tube **DTRY-ADN-F** and the silicone tube **DTRY-ADN-S**.

**CONTROLLER** ( For Blow Type and Compact Blow Type )

● DTRY-ELC11

- Notes:
1. The Controller is for the Blow Type Ionizer.
  2. Provide 24 VDC power with 410 mA or larger.  
For an AC adapter, use the **DTRY-ELC04**.
  3. The cable used to connect the controller and the Ionizer is included in the product.
  4. For a power supply cable, use the power and signal cable in the Ionizer accessories.
  5. Separately purchase a cable for external signals.
  6. Ground the controller power supply and the Ionizer separately.

## Graphs of Static charge Removing Characteristics (Blow Type)

The following graphs show static charge removing characteristics obtained when using the blow type ionizer, DTRY-ELB01 (1-head type) with typical nozzles. Using the proper item to the proper place enables static charge removal with superior ion balance.

Notes 1: The static charge removing characteristics are measured by in-house test standard using the charged plate monitor of 20 pF, □150 mm.

2: The static charge removal time means decaying time from ±1000 V to ±100 V.

Photo shows a full-size

Various Nozzles

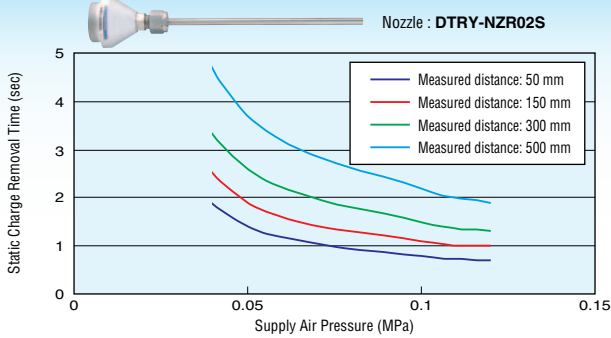

※ For the graph of static charge removing characteristics obtained when using the standard nozzle DTRY-NZR01NS, see page 10.

# Graphs of Static charge Removing Characteristics
